

Flex Databases Modules Overview

Flex Databases is a company that provides e-solutions for clinical trials. Software provided by Flex Databases makes the entire clinical trials process and the management of pharma, biotech and CRO seamless and controlled. It means more effective information processing, data management that saves you time, flawless report generation and capabilities plus KPI tracking.

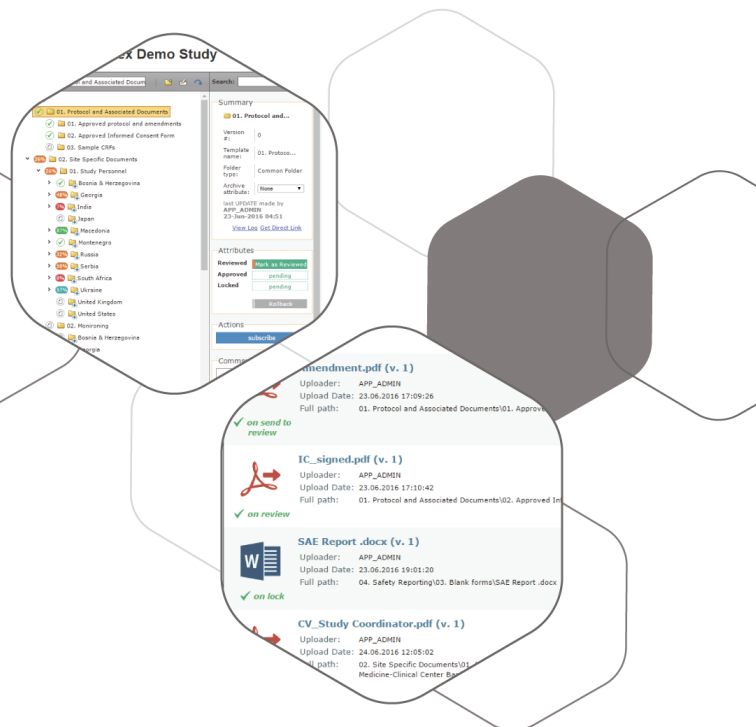

Unlike the majority of similar environments on the market, Flex Databases platform is highly configurable and is able to meet even the most specific needs. Our wide array of built in modules is designed to address each step of the Research and Development process and give our clients an edge in streamlining their workflow. Flex Databases is a reliable IT vendor that is agile and provides constant client support with our unique understanding of the market and an unwavering focus on quality.

We offer a unique platform which allows combining traditional features related to management of clinical trials (CTMS, EDC&IWRS) with the functionality for running internal pharma companies and CRO processes as well as a capability to manage financial data, invoicing and expenses. All modules developed by Flex Databases are validated and 21 CFR Part 11 compliant.

Trial Master File

TMF ensures constant inspection readiness by means of automated folders completeness statistics, missing documents reports and various notifications. TMF is 24/7 securely available from anywhere in the world on any device. Get the most value for money and improve your productivity by using advanced Flex Databases TMF Solution.

Main Features and Advantages
