Project Catalogue	Investigators & Sites Management	Expense Reporting	Trial Master File
Workflow Management	Subject Tracking & Invoicing	Time Sheets & Utilization	Learning Management System

Flex Databases is a software development company. We develop e-Clinical systems for CROs and pharmaceutical companies.

Our platform consists of 12 modules that cover every aspect of clinical trials, from project startup to pharmacovigilance. We offer both single modules and a unified solution to maintain all processes - you can cover all existing software needs with only one vendor.

All modules developed by Flex Databases are validated and compliant with 21 CFR Part 11 and other global regulations. We provide flexible and configurable baseline system versions with free updates, perform customizations and development for client-specific needs.

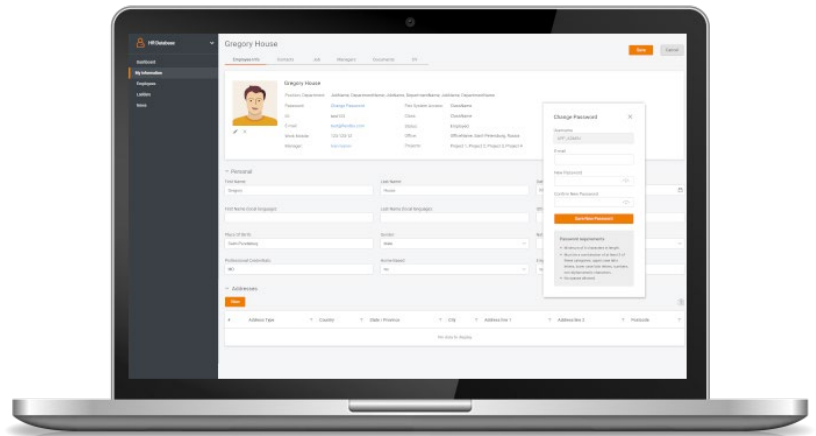

Unlike traditional e-Systems developer, Flex Databases provides a combination of flexibility, fair prices, and go-the-extra-mile service and support.

Project Management & Budgeting

Make the complex financial part of your projects easy. Use different budget templates to quickly setup new projects. Plan budgets allocate resources and workload for an unlimited number of projects. Track your project performance and invoices.

Main features and advantages
