Workflow Management	Subject Tracking & Invoicing	Time Sheets & Utilization	Learning Management System

Flex Databases is a software development company. We develop e-Clinical systems for CROs and pharmaceutical companies.

Our platform consists of 12 modules that cover every aspect of clinical trials, from project startup to pharmacovigilance. We offer both single modules and a unified solution to maintain all processes - you can cover all existing software needs with only one vendor.

All modules developed by Flex Databases are validated and compliant with 21 CFR Part 11 and other global regulations. We provide flexible and configurable baseline system versions with free updates, perform customizations and development for client-specific needs.

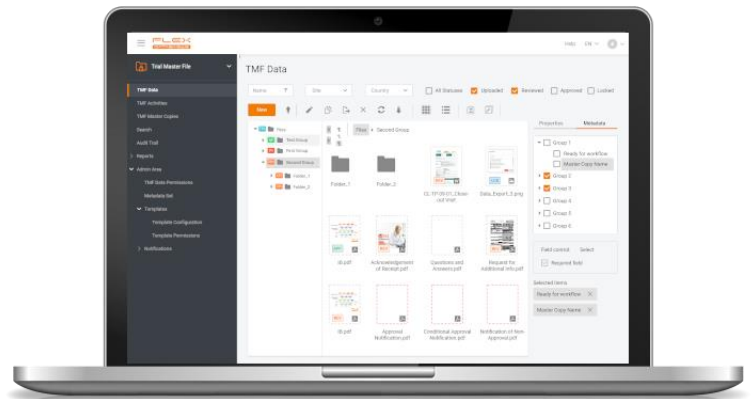

Unlike traditional e-Systems developer, Flex Databases provides a combination of flexibility, fair prices, and go-the-extra-mile service and support.

Trial Master File

TMF ensures constant inspection readiness by means of automated folders completeness statistics, missing documents reports and various notifications. TMF is 24/7 securely available from anywhere in the world on any device. Get the most value for money and improve your productivity by using advanced Flex Databases TMF Solution.

Main features and advantages

- Web-based: no installation needed
- Access control, based on project role, sites, folders, countries and for external users
- Digital signature
- Automated upload of files from CRA Activity Management
- Simple TMF template creation (e.g. DIA reference model based), including folders and placeholders for files
- Powerful search engine
- Batch documents upload and download with drag and drop function
- Ability to leave comments for each file or folder
- Real-time statistics on folders completeness
- Adjustable notifications based on subscriptions to folders
- Business Intelligence: widgets and reports
- Automated filing of documents from CTMS
- Documents review configurable workflow and electronic signature
- 21 CFR Part 11 compliant
- Custom metadata setup and management
- Metadata actions (e.g. notification on expiry date of the document)
- Dynamic metadata report
- My Views section – user-defined lists of documents based on metadata groups
- My Favorite section – any documents, marked as favorite, at one place
- QC Workflow for all file types, folders and placeholders
- Possibility to connect TMF as an external drive through WebDAV protocol
- Full Audit Trail and versioning
- Online viewing and authoring right from a browser
- Mobile application
- E-mail blasts from TMF to sites
- Uploading documents via e-mail
- OCR
- Easy archiving documents after the end of the project
- Ad-hoc reporting tool for cross-project & cross-module reporting
